### How to randomize your list

Enter each item on a new line, choose your settings, and click the button to generate your randomized list.

Randomly choose and rank your friends, pets, family members, objects in your house, what you'd like to do today, what video game you should play, seeds in a tournament bracket, etc. Create a random list of whatever you choose.

Want to separate your list in to groups? Use the [random team generator](#).

Also try: [Random Picker](#), [Custom List](#), [Decision Maker](#), [Name Picker](#), [Team Generator](#), [Yes or No](#), or just [create your own list](#).
